Declass Review by NIMA/DOD

MEMORANDUM FOR THE RECORD

25X1A

SUBJECT: [ ] Electronic Rectifier

25X1A

REFERENCES: (a) Memorandum for the Record from [ ]  
dated 10 April 1962; same subject

25X1A

(b) Memorandum for [ ] from Chief, TID,  
dated 12 April 1962; same subject

25X1A

25X1A

(c) Telephone conversation between [ ]  
[ ] In-House Maintenance Representative, and Major  
TP & DS, on 17 April 1962

25X1A

1. [ ] said that ESPA, AMS, needed the outside dimensions of the rectifier's shielded enclosure for planning the installation of both rectifiers in Abert Hall, the new AMS building. He also wanted to know who would pay for the move and for a change in design so that the door and the service panel would be on the short (14') side instead of the present long (18') side.

25X1A

2. [ ] was told that the shielded enclosure could be modified to meet about any requirements, but that the matter of funding would have to be decided jointly among ESPA, NPIC and the NPIC Army Element.

3. The present status of the [ ] rectifier/shielded enclosure matter is as follows:

25X1A

a. The architects for the new buildings for ESPA and NPIC are both planning space, power and air conditioning requirements on the basis that they will get both rectifiers (one belonging to TID/NPIC and the other belonging to the Army Element) in their respective buildings.

b. No rectifier tapes have been produced to date and, as a result, no rectified material has been produced to date.

c. Mr. Lundahl has expressed an interest in the rectified material. (See reference (b) above.)
